OBJECTIVE

Turning user problems into products that ship. Built Unifeed, a social media platform, from discovery to a platform tested with 75 users, achieving ~50% reduction in platform-switching time and 4.5+/5 satisfaction. First Class Computer Science graduate with data-driven experience at Deloitte.

PRODUCT EXPERIENCE

Product Lead | Unifeed

Sep – May 2025

- o Identified productivity loss from multi-platform social media usage through **15+ discovery interviews** before scoping a single feature
- o Defined MVP, prioritised backlog by effort-vs-impact, and ran **3 Agile sprint cycles** from prototype to live product
- o Validated with 75 users: achieved ~50% reduction in platform-switching time and 4.5+/5 satisfaction — used to justify v2 roadmap
- o Cut two planned features mid-build after usability testing showed users consistently deprioritised them

Founder | WeLearn

April 2026 – Present

- o Building an inclusive tutoring marketplace covering mainstream subjects (Maths, English, Sciences), African languages, and SEN provision — allocating learners to specially trained tutors based on need
- o Defined core user journeys across two distinct user types (students and tutors); website pre-launch with traction metrics to follow

WORK EXPERIENCE

Forensic Technology Associate | Deloitte LLP London

Sept 2023 – Present

Paused Sept 2024 – May 2025 to complete final year at Aston University

- o Contributed to the strategy and UX design of an internal product resource hub — shaped content architecture and product direction as a core team member from early-stage through to rollout.
- o Conducted large-scale investigations and data analysis on financial crime cases using eDiscovery tools such as Relativity , Encase and Nuix translated complex evidence into clear, client-ready findings.
- o Resolved recurring client blockers around eDiscovery technology on multiple concurrent engagements
- o Led volunteer team that raised **£1,000** for the Young Women's Trust

Teaching Assistant Computer Science | Aston University

Sept 2024 – May 2025

- o Ran lab sessions and tutorials in Data Structures & Algorithms and Computer Systems for undergraduate cohorts

Computer Science Tutor | School of Coding & AI

March – Aug 2023

- o Simplified complex computational topics to students between the ages 6 -18.
- o Tailored my teaching techniques to suit every student's learning styles.
- o Tutored one-on-one and group classes in Scratch, Python, Java, and Computer science.

Advanced data analytics Intern | GSK PLC London

June – Sept 2022

- o Built Power BI dashboards, published on GSK's mainstream website for clients worldwide to access useful information.
- o Conducted exploratory analysis in Python and MySQL to surface sales trends

EDUCATION

BSc. Computer Science - First Class Honours - Aston University

Sept 2021 – 2025

- o Key Modules: Enterprise Computing strategies (100), Software Project Management (96), Software Engineering (90), Multi-Agent Systems (92), AI (86)

Queens College Lagos

Sept 2014 – 2020

- o WASSCE: 2A*'s, 3B's, 2C's in Maths, Further Maths, Physics, Chemistry, Biology, Economics and English.

SKILLS

Product: MVP Definition, User Research & Usability Testing, PRD Writing, Roadmapping, Backlog Prioritisation , Agile/Scrum, OKR Setting .

Tools: Figma, Miro , Power BI, Confluence, Microsoft Office Apps, InVision, Wireframing, Prototyping.

Data & Eng: Python · SQL · Power BI · Java · Git · Azure Data Studio · MySQL

Soft Skills: Critical-Thinking, Curiosity, Creative, Adaptable, Collaborative, Goal-Oriented, Resilient, Resourceful, Intuitive, Product management and Excellent communication.

EXTRACURRICULAR ACTIVITIES

Clubs and societies: British BCS Professional Membership (MBCS) , Active Volunteer at Black Techfest, and 5MFutures Charity initiative.

CERTIFICATES & AWARDS

- o Artificial Intelligence Micro-Certification (AIC) - Product School (2025).
- o Product Discovery Micro-Certification (PDC) - Product School (2025)
- o Awarded IOT Ambassador by CISCO amongst 2000 students (2020).
